

STEP INTO THE CONCRETE REVOLUTION WITH OUR MODERN LIGHTWEIGHT PAVERS

OVER 50% LIGHTER THAN REGULAR CONCRETE

Fall in love with our exclusive range of architectural lightweight FRC products. Our exclusive technique and formula have allowed us to half the weight in comparison to regular concrete elements, whilst remaining incredibly strong and durable. This revolutionary improvement makes our unique products much **easier and safer to install, reducing the overall costs of their installation.**

A GOOD CHOICE FOR THE ENVIRONMENT

Through buying UK made products, you are helping to **reduce significantly the carbon footprint** in comparison to imported materials. In addition, we have reduced the amount of cement in our mix design, and we offer the option of ordering our products made with cement free alternative, for an even greater environmental benefit. We work in a JIT manufacturing system where we don't overproduce. We create the product in response to the demand. No unnecessary waste, no overproduction or unnecessary haulage cost, which is good for us, **good for you and good for the planet.**

WE CATER TO ALL YOUR BUILDING NEEDS

Get excited with our new range of architectural concrete for unique and timeless spaces. Whether you are a contractor, a specialised merchant, architect or garden designer, discover how our selection of modern lightweight concrete elements including large-format slabs and pavers, seating elements and floating steps will inspire you with endless design possibilities. We also provide a bespoke service where **we manufacture to your exact specifications** your building creations.

Be inspired by our range of products and keep in mind that with our bespoke service and personal approach we can manufacture to your exact requirements any sizes you require.
